A fruitful meeting in the Niceto Pérez Municipality, directed by the Governor accompanied by provincial directors. Monitoring compliance with the indications issued from the current state that the world

lives today, is a task of the first order.

The main indicators in the territory are evaluated, the results that are produced today are the result of sacrifice and dedication, so we are taking on each task.

There is more to do, review the methods used and change everything that needs to be changed was one of the Governor's recommendations.

It is time, as the Concept of Revolution says, to: emancipate ourselves by ourselves and with our own efforts.
